About the Trainer

Amruta Bondar is an experienced QA Engineer and Software Testing Trainer with 4+ years of real-time industry experience in Manual Testing, API Testing, SQL, ETL Testing, and Database Validation.

She specializes in software quality assurance, test planning, functional testing, API validation, database testing, and Agile methodologies. She also brings practical knowledge of automation testing concepts and modern QA practices.

With experience across healthcare and enterprise projects, she focuses on delivering practical, industry-oriented training through real-world scenarios, hands-on exercises, and project-based learning.

She is passionate about mentoring aspiring QA professionals and helping them develop the technical skills required to succeed as Full Stack QA Engineers.

Area of Expertise

Manual Testing

- Software Testing Fundamentals
- SDLC, STLC & Agile Methodologies
- Test Planning, Test Scenarios & Test Cases
- Functional, Regression, Smoke & Sanity Testing
- Integration, System & UAT Testing
- Bug Life Cycle & Defect Management
- Test Design Techniques – BVA, ECP & Decision Tables

API Testing

- REST API & SOAP Fundamentals
- API Testing using Postman
- HTTP Methods & Status Codes
- Request & Response Validation
- JSON & XML Validation
- Authentication & Authorization
- API Collections & Environment Management
- Swagger API Documentation

SQL & Database Testing

- SQL Fundamentals
- DDL, DML & DQL Commands
- SELECT Queries & Filtering
- SQL Joins – Inner, Left, Right & Full
- Subqueries & Nested Queries
- Aggregate & Window Functions
- Database Validation & Data Integrity
- ETL Testing & Data Validation

Automation Testing – Playwright with TypeScript

- Playwright Introduction & Setup
- TypeScript Fundamentals
- Locators – XPath, CSS & Built-in Locators
- Test Scripts & Assertions
- Handling Web Elements & Browser Interactions
- Dropdowns, Alerts, Frames & Web Tables
- Hooks & Test Execution
- Page Object Model (POM)
- Playwright Framework Development
- Test Reporting using Allure
- CI/CD Integration – Jenkins & GitHub Actions

QA Tools & Methodologies

- JIRA – Bug Tracking & Agile Project Management
- Scrum & Agile Methodologies
- GitHub & Version Control
- Jenkins & CI/CD Fundamentals
- ETL Testing – Informatica & Control-M

Key Achievements

- 6+ years of QA experience across Healthcare & Enterprise domains.
- Hands-on ETL and Database Testing with SQL query expertise.
- Contributed to incident management projects for UHG (USA).
- ISTQB – Certified Tester Foundation Level (CTFL).

Learn. Implement. Thrive.
